

KAHAD ADAMU, Ph.D.

Akron, OH

Kahadadamu1991@gmail.com

(716) 520-8217

PROFESSIONAL SUMMARY

Data Scientist with more than five years of professional experience and expertise in advanced analytics, predictive modeling, machine learning, generative AI, business intelligence, and data engineering. Experienced in building scalable data pipelines, developing executive dashboards, and conducting predictive modeling. Proven ability to translate complex data into actionable insights for strategic planning, policy development, and performance evaluation. Strong proficiency in Python, R, SQL, Tableau, and Power BI, with deep expertise in predictive analytics, data visualization, and stakeholder engagement. Proven ability to collaborate across technical and non-technical teams, communicate findings to leadership, and support data-informed strategic planning and decision-making.

PROFESSIONAL EXPERIENCE

Data Scientist for the Northeast Ohio Workforce in Nursing (NEOWIN) Impact Grant
Institutional Effectiveness & Nursing, Stark State College, North Canton, OH

Feb 2026 – Present

- Analyze student and workforce data to support grant evaluation, institutional effectiveness, and program improvement initiatives.
- Develop interactive dashboards and automated reports to track student outcomes, retention, and workforce placement metrics.
- Collaborate with academic leadership to translate data into actionable insights for planning and accreditation.
- Design predictive models to support forecasting, retention analysis, and operational planning initiatives.
- Ensure data quality and integrity through validation, cleansing, and governance procedures.

Database Manager & Social Science Researcher

National Sea Grant College Program, NOAA | Silver Spring, MD

Feb 2025 – Feb 2026

- Built automated ETL pipelines, improving data quality and reducing processing time by 30%.
- Performed clustering, decision-tree, and time-series forecasting to predict and evaluate state-level program outcomes and inform strategic investments.
- Wrote SQL scripts for creating databases, updating data, and retrieving data.
- Built dashboards in Power BI for showcasing and tracking state-level program budget spending, project awards, and economic impacts of projects.
- Prepared reports in compliance with federal data governance and multi-agency data-sharing policies.

Data Scientist & Analyst

Community for Global Health Equity, The State University of New York (SUNY) at Buffalo | Buffalo, NY

Aug 2022 – Dec 2023

- Built a complex predictive model to analyze environmental health disparities and exposure risks.
- Extracted secondary data from sources including the Census Bureau, other secondary sources, and performed exploratory data analysis (EDA)
- Automated reporting workflows, reducing manual reporting effort by 40%.
- Prepared technical and financial reports for the Mycelium-based soil remediation project in compliance with the institution's policies (SUNY Buffalo) and federal data governance (Department of Housing and Urban Development).
- Trained Research Aides on institutional ethics, data reporting, data analysis reproducibility, and model interpretability.

Spatial Data Scientist & Analyst

Food Systems Planning & Healthy Communities Lab, The State University of New York (SUNY) at Buffalo | Buffalo, NY

Aug 2021 – Aug 2024

- Developed spatial econometric and network models linking food access to health outcomes.
- Built interactive dashboards using ArcGIS and Power BI with automated data pipelines.
- Improved data quality and validation processes, increasing analytical accuracy by 25%.
- Co-authored peer-reviewed research on predictive modeling and community planning.

Associate Data Scientist

Excellence Data Business Solutions LLC | Accra, Ghana

Jan 2017 – Aug 2021

- Designed fraud-detection and risk-assessment models using Python and statistical techniques.
- Developed Key Performance Indicators (KPI) dashboards and decision-support tools for financial and insurance business strategies.
- Conducted A/B testing and conversion analysis to optimize marketing performance.
- Supported database design, data cleaning, and automation in line with compliance standards.

EDUCATION

- Ph.D., Urban and Regional Planning | The State University of New York (SUNY) at Buffalo | June 2025
- M.Sc., Urban Development Planning | University College London | November 2016
- B.Sc. (Hons), Land Economy | Kwame Nkrumah University of Science and Technology (KNUST) | June 2014
- Certificate, Applied Data Science | Massachusetts Institute of Technology (MIT) | December 2025

TECHNICAL SKILLS

Programming & Analytics: Python, R, SQL, SAS, SPSS, STATA

Machine Learning Techniques: Regression, Classification, Clustering, Time Series, Extreme Gradient Boost (XGBoost), Neural Networks, Convolutional Neural Networks

Data Visualization: Power BI, Tableau, Matplotlib

Data Engineering: Data Integration, Workflow Automation, Data Cleaning, Validation

Databases Management: MySQL, PostgreSQL, Snowflake, MongoDB

ETL & Automation: AWS, Alteryx, Power Automate

Spatial Data Analysis: ArcGIS Pro, QGIS

Statistical Methods: Hypothesis Testing, Experimental Design, Model Validation

Generative AI: Retrieval Augmented Generation (RAG), prompt engineering, Agentic AI

Cloud & Tools: Azure, AWS, Jupyter Notebook

CORE COMPETENCIES

- Advanced quantitative analysis and predictive modeling
- Statistical Modeling & Machine Learning
- Institutional Research & Higher Education Analytics
- Data Visualization & Dashboard Development
- Data Governance & Compliance Reporting
- Experiment Design & Causal Inference
- Stakeholder Engagement & Communication
